DETAILED ACTION

Specification

The abstract is objected since:

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Objections

Claims 1-5 are objected to because of the following informalities: "distil" on line 2 of step (1h) is misspelled. Appropriate correction is required.

Claims 3 and 4 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should recited in an alternative form or does not depend on other multidependent claims.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1764

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, on lines 10 and 11, the meaning of the expression “covering all measured of the method” cannot be understood by the examiner.

On line 3 of step (1g), concentration ratios should be further defined by the material which is adjusted.

Claim 2 is confusing since it is unclear due to the grammar error. Applicants are suggested to review the claim to correct it.

“preferably” should be removed from claim 4.

Claim 5 is ambiguously constructed and indeterminate in scope because they purport to claim both an apparatus and method of using or practicing the apparatus in a single claim.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 5 is rejected under 35 U.S.C. § 101 because they improperly embrace both product or machine and process. The language of 35 U.S.C. § 101 sets forth statutory classes of invention in alternative only. See *Ex parte Lyell*, 17 USPQ2d 1549.

Allowable Subject Matter

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Art Unit: 1764

Claims 2-4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
